Project Overview

About Project

Musicfusty is a music streaming application designed to provide a social and interactive listening experience. Unlike traditional music streaming platforms, Musicfusty emphasizes real-time interaction and community building among its users. Here are some key features and details

Idea Thinking

Our goal is to design a seamless and enjoyable experience that helps a user friendly and efficient digital platform for users to view, explore, and interact with friends.

Style Guide

Style guide

Style guide is a resource that contain the necessary guide related to any app user interface, Which ensure continuity through the app design.

Mid Fidelity wireframes

High Fidelity wireframes

A high-fidelity wireframe is a detailed and polished representation of a digital interface, providing a realistic visual and functional preview of a website or application before development. It includes refined design elements and closely simulates final user experience.
